

I Can Use Multiplication and Division to Help Me Understand Math

I I can understand multiplication by thinking about groups of objects. 3.OA.1

- I can understand division by thinking about how one group can be divided into smaller groups. 3.OA. 2
- I can use what I know about multiplication and division to solve word problems. 3.OA.3
- I can find the missing number in a multiplication or division equation. 3.OA.4

I can use the Commutative property of multiplication. (I know that if $6 \times 4=24$ then $4 \times 6=24.) 3 . O A .5$
1 I can use the Associative property of multiplication. (To figure out $3 \times 5 \times 2$ I can multiply $3 \times 5=15$, then $15 \times 2=30$ OR multiply $5 \times 2=10$, then $3 \times 10=30$.) 3.OA. 5
vivan use the Distributive property of multiplication. (To figure out $8 \times 7$, I can think of $8 \times(5+2)$ which means $(8 \times 5)+(8 \times 2)=40+16=56$. $) 3 . O A .5$
v I can find the answer to a division problem by thinking of the missing factor in a multiplication problem. (I can figure out $32 \div 8=$ because $I$ know that $8 \times 4=32$.)

- I can multiply and divide within 100 easily and quickly because I know how multiplication and division are related. 3.OA. 7
V I can use addition, subtraction, multiplication and division to solve all kinds of word problems and then use mental math to decide if my answers are reasonable. 3.OA.8
I can find patterns in addition and multiplication tables and explain them using what I know about how numbers work. 3.OA. 9

I Can Use Number Sense and Place Value to Help Me Understand Math
I I can round numbers to the nearest ten or 100. 3.NBT.. 1

- I can add and subtract numbers within 1000. 3.NBT. 2

I can quickly and easily multiply any one digit whole number by 10. 3.NBT. 3
I Can Use Fractions to Help Me Understand Math

- I can show and understand that fractions are equal parts of a whole. 3.NF. 1
(1 I can label fractions on a number line because I know the space between any two numbers can be thought of as a whole. 3.NF. 2
- I can explain in words or pictures how two fractions can sometimes be equal.
3.NF. 3
- I can compare fractions by reasoning about their size. 3.NF. 3
- I can show whole numbers as fractions. ( $3=3 / 1$ ) 3.NF. 3

1. I can recognize fractions that are equal to one whole. $(1=4 / 4)$ 3.NF. 3

I Can Use Measurement and Data to Help me Understand Math
vive I can tell and write time to the nearest minute. 3.MD. 2

- I can measure time in minutes. 3.MD. 1

. I can solve telling time word problems by adding and subtracting minutes. 3.MD. 1
- I can measure liquids and solids with liters, grams and kilograms. 3.MD. 2

V I can use addition, subtraction, multiplication and division to solve word problems involving mass and volume. 3.MD. 2

- I can create a picture or bar graph to show data and solve problems using the information from the graphs. 3.MD. 3
- I can create a line plot from measurement data, where the measured objects have been measured to the nearest whole number, half or quarter. 3.MD. 4
- I can understand that the area of plane shapes can be measured in square units. 3.MD. 5
(1) I can measure areas by counting unit squares. 3.MD. 6
- I can measure area by using what I know about multiplication and addition. 3.MD. 7

I I can solve real world math problems using what I know about the perimeter of shapes.

## 3.MD. 8

I Can Use Geometry to Help Me Understand Math

I can place shapes into categories depending upon their attributes. 3.G. 1
I can recognize and draw quadrilaterals such as rhombuses, rectangles and squares, as well as other examples of quadrilaterals. 3.G.1
I can divide shapes into parts with equal areas and show those areas as fractions. 3.G.2
